Building Unbreachable Defenses
for a Safer Tomorrow…

ZYROSEC

Securing What Matters Most

Welcome to **ZyroSec**

We are a US-based Cyber Security Consulting company dedicated to safeguarding the digital world. At **ZyroSec**, our mission is to identify and address advanced vulnerabilities before they evolve into significant threats, ensuring your business remains secure in an increasingly complex cyber risk landscape.

Our vision

Empower organizations to operate confidently in the digital world. We aim to set new standards in cyber defense by continuously innovating and evolving to meet the challenges of tomorrow

Our Mission

Empower organizations by providing cutting-edge cybersecurity solutions that protect digital assets, ensure privacy, and foster trust in a rapidly evolving digital landscape

With a team of highly skilled security engineers, **ZyroSec** combines years of hands-on experience with a profound understanding of global and local cybersecurity challenges. Our engineers are not only seasoned professionals but also hold some of the most prestigious certifications in the industry including:

- Offensive Security Certified Professional (OSCP)

- Offensive Security Wireless Professional (OSWP)

- CREST Registered Penetration Tester (CRT)

- CREST Practitioner Security Analyst (CPSA)

- eLearnSecurity Web Application Penetration Tester eXtreme (eWPTXv2)

- eLearnSecurity Certified Professional Penetration Tester (eCPPTv2)

- eLearnSecurity Mobile Application Penetration Tester (eMAPT)

- ISO/IEC 27001:2022 ISMS Lead Auditor

- ISO/IEC 27001 Internal Security Auditor (ISA)
  Certified Information Security Manager (CISM)

Web Application Penetration Testing

Identifying and mitigating vulnerabilities in web applications to protect your business from cyber threats and ensure secure digital interactions.

API and Web Services Penetration Testing

Securing APIs and web services by identifying potential security weaknesses and ensuring safe, reliable data exchange

Network and Infrastructure Penetration Testing

Simulating real-world cyberattacks to uncover vulnerabilities in your network and infrastructure, ensuring robust security and compliance with industry standards.
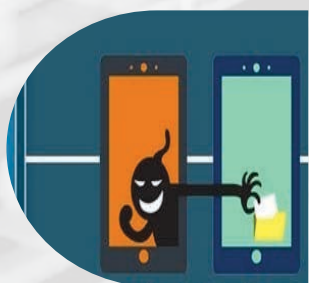

Mobile Application Penetration Testing

Protecting your mobile applications from cyber threats through thorough vulnerability assessments and proactive security measures

Red Team Operation

Simulating sophisticated cyberattacks to test the effectiveness of your security measures, enhancing your organization's resilience against real-world threats

Purple Team Engagements

Integrating offensive and defensive security strategies to foster collaboration and improve your organization's overall security posture

Cloud Security Review

Conducting comprehensive security assessments for cloud environments, including AWS, GCP, Azure, and Oracle, to identify and rectify configuration vulnerabilities

Source Code Security Review

Examining the security of your source code to prevent vulnerabilities and ensure adherence to best practices for secure software development

Smart Contract, Web3 and Wallet Security

Simulating sophisticated cyberattacks to test the effectiveness of your security measures, enhancing your organization's resilience against real-world threats
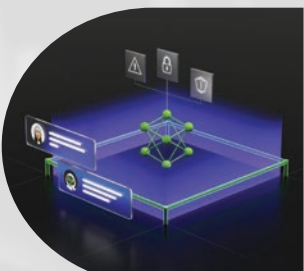

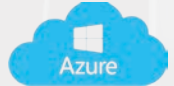

Adversarial Prompting Security Analysis

Integrating offensive and defensive security strategies to foster collaboration and improve your organization's overall security posture
